Historically, my artistic practice has centered on activist and feminist text-based works. Yet in response to the current state of the world, I've felt compelled to shift—to create pieces that celebrate the beauty and light that still surrounds us and offer a form of transcendence. Drawing from lived experiences, emotional currents, and life's inherent complexity, I rely on intuition and the evocative power of color to cultivate serenity, nostalgia, longing, and connection. All works are mixed media, resin, acrylic, vinyl, and acrylic and with my photography. *Have a favorite word or quote — I love doing commissions for people!*
